

WHAT IS GIYO?

Golf In Your Office - GIYO - is the vehicle that drives the virtual game forward and brings the game to you, wherever you are. No more time out of the office required. Golf Simulators are highly instructional, offering instant analysis from one's swing; tracking and camera technology produce accurate measurements like ball spin and speed, launch angle, and shot direction. GIYO captures these outputs thanks to light-wave technology in precise animation. More than 90 courses are available for play, illuminated in high-definition graphics.

Technology and electronics have taken golf into a new realm of virtuality which offers everyone the opportunity to play the beautiful game, wherever, whenever and allows the game to be played and taught at whatever pace is required. With GIYO and our PGA pro golfers on site with you, we will help you turn strategy sessions into business golf coaching sessions.

Those after work office pub sessions can become an opportunity to play a quick round of golf at St. Andrews with your staff and clients; in the comfort of your boardroom or office social area.

Simulator Courses and Facilities

The facility offers real-world graphics and sound effects that leave the golfer feeling as if they are actually playing any of the courses (always new courses being added), which are some of the world's most famous courses such as St. Andrews, Pebble Beach, TPC Sawgrass, Gary Player Country Club and many others.

In addition to this, the system also provides for a virtual driving range, which also provides a fun and informative environment perfect for practice and instruction.

Let's get you into the swing of things

Office Setup

Our mobile golf simulator setup gives companies a unique opportunity to offer staff, clients and other stakeholders, the gift of golf. Bringing GIYO to your offices enables you to provide your staff & stakeholders a variety of fun & innovative marketing and employee relation activities, without having to venture outdoors to a golf club or driving range to enjoy the game.

The simulator is a “club-tracker” meaning that you can use a foam ball ensuring that safety and damage are no longer a factor when employing GIYO.

You can even have an inter-office challenge with people anywhere in the world who have the internet, so you can even play against your foreign offices if & when the opportunity arises!

Mobile Setup

The typical setup requires a space of 6m by 3m with a ceiling/roof height of 2,5 m.

A typical setup of one single unit is:

- 3 hitting mats (for both left and right-handed golfers).
- Mobile screen (3m wide x 2m or 2,5 m high (depending on ceiling height)).
- Mobile-mounted Projector.
- Golf clubs (left and right-handed).
- PGA professional to manage the simulator and provide on-site lessons and coaching.
- Laptop and cabling – Provided there is an electric point present.

We have 5 simulators available, so we can accommodate large volumes of golfers and guests for coaching clinics, challenges and in-office play.

RATES

PLEASE NOTE THAT ALL OTHER RATES ARE DEPENDED ON PACKAGE SELECTION, NUMBER OF PEOPLE AND TAYLOR-MADE REQUIREMENTS. A DETAILED BUDGET WILL BE PRESENTED UPON RECEIVING A DETAILED BRIEF FROM CLIENT
